I am a web developer who is enthusiastic about learning new skills and solving problems. I have experience with **Javascript, PHP, Python, SQL, C++, Java, React, Express, Docker, AWS, Git, and Linux** through coding as a hobby and personal projects. I have been interested in writing code as a hobby for about 10 years, and I am now seeking a role in backend web development in order to formalise my experience and build a career out of my enjoyment of problem-solving.

Projects

Login page project

> This project is a straightforward demonstration of my skills in several areas of web development. I used React, Express, and MongoDB to construct a webpage that implements login functionality based on the OAuth2.0 specification. The logged-in area of the project gives the user the ability to create, read, update, and delete notes as a demonstration of the backend's REST API. The project makes use of Docker containers, which are deployed to an AWS Fargate instance using the ECR. Further details about the project can be found at: https://jamiethomas.website/projects/login-page

Work History

2016-11 – 2020-03   **Network Support Technician**
Ethos Technology, Banbury
- Providing technical support to clients
- Maintaining network infrastructure
- Responding to support tickets
- Speaking to clients for troubleshooting
- Setting up internet and phone for new users
- Keep billing staff updated regarding clients' network usage
- Document network port usage across building
- Regularly carry out data-centre checks
- Assisting in major network infrastructure upgrade project

Education

- Working on projects as part of a team
- Using problem-solving skills to resolve hypothetical international disputes
- Time management & deadlines

Key Skills

- Efficient at picking up new technologies
- Ability to work individually and as part of a team
- Very proficient with many aspects of technology
- Great problem-solving skills
- Great oral and written communication skills
- Eager to help other people
- Critical thinking

Hobbies & Interests

Writing code has been one of my hobbies for around 10 years, and I have experience in several languages. My interest comes from a desire to find out how things like videogames and computer programs work. This has also driven me in other areas, such as building my computer and recently changing my operating system to Linux. Outside of coding, I have a strong interest in reading about politics and history, and I enjoy listening to prog rock music. In my spare time I also like to learn languages. I have taught myself Norwegian to a competent level through reading, and I am now doing the same with German.
